

## Cancer screening programmes: implementation and scale-up

We will explore the key factors that contribute to the success of cancer screening programmes, including community engagement, health-care provider training, commitment of policy-makers, and the potential for collaboration with researchers. The panel will also discuss how implementation research can inform the design and implementation of effective screening programmes, and the role of pilot studies to inform the design and scale-up of effective screening programmes in identifying and addressing implementation challenges.

**Dr Partha Basu**

Head  
Early Detection, Prevention and Infections Branch (EPR)  
IARC/WHO

## Guest Speakers

**Dr Sharon Katai Kapambwe**

WHO – Cancer in East and Southern Africa  
AF/NCD Non-Communicable Diseases  
(UCN)  
Harare, Zimbabwe

**Dr Andre Carvalho**

Scientist, Deputy Head  
Early Detection, Prevention and Infections  
Branch (EPR)  
IARC/WHO
