

## The WHO global initiatives on cancer: bringing together stakeholders from around the world

Implementing the World Health Organization (WHO) global initiatives on cancer could save millions of lives. How are they implemented and integrated into national policies? In this session, experts will discuss the goals and scope of and the progress made by the three WHO initiatives on cancer: the Cervical Cancer Elimination Strategy, the Global Initiative for Childhood Cancer, and the Global Breast Cancer Initiative.

**Dr Partha Basu**

Head  
Early Detection, Prevention, and Infections Branch (EPR)  
IARC/WHO
